

MINH HO

B.S IN COMPUTER SCIENCE, DECEMBER 2025

📞 619-742-1596 • ✉️ hovuminhmike@gmail.com • 🌐 mnvho.github.io • in mnvho

SUMMARY

A computer science professional with strong military experience, seeking to leverage technical skills and military background in a challenging role. Passionate about software development, embedded systems, and AI/ML solutions.

- Security clearance: Active U.S Secret Clearance (May 2024 - Present)
- *Distinguished Honors Graduate* from the US Army Ordnance School
- Responsible for revamping online presence of a multi-million dollar manufacturing company.
- Excellent communicator with a deep understanding of data structures, algorithms, and data solutions.
- Proven ability to collaborate effectively with technical teams and stakeholders to meet project goals

EDUCATION

University of California - Riverside

Sep. 2022 – December. 2025 📅

Major: B.S. Computer Science

Relevant Courses: Data Structures & Algorithms, Compiler Design, Automata & Formal Languages, Operating Systems, Design & Architecture of Computer Systems, Database Management Systems, Concurrent Programming & Parallel Systems, Embedded Systems, Software Engineering, Big Data Analysis, Machine Learning & Data Mining, Artificial Intelligence, Software Development

EXPERIENCE

UCR Robosub – Riverside, CA

Feb. 2023 – June. 2024 📅

Software Developer

- Developed, tested, and optimized autonomous underwater vehicles (AUVs) for the RoboSub competition, collaborating with a multidisciplinary team.
- Built and integrated an autonomous control system using **ROS**, **OpenCV**, and **Python**, enhancing real-time image processing that improves decision-making, task execution efficiency, and navigation accuracy.

Robotics Team (FRC 3647) – San Diego, CA

Sep. 2018 – Jun. 2020 📅

Lead Developer

- Led a team of 5 developers in designing and implementing software for autonomous and teleoperated robot functions, resulting in multiple top-1 finishes in regional and top-8 in national competitions.
- Mentored 10+ students in **Java**, **Python**, **object-oriented programming**, **PID control**, and **computer vision**, fostering team growth and enhancing technical capabilities.
- Designed and implemented an autonomous path-following algorithm using **odometry** and **CV localization** on the **Raspberry Pi**, improving robot navigation accuracy in competitions.

Apollo Manufacturing Services – San Diego, CA

Jun. 2019 – Sep. 2019 📅

Web Developer

- Designed, developed, and launched a fully responsive commercial website using **HTML**, **CSS**, **JavaScript**, and **PHP**, leading to a 100% increase in web traffic and improved client engagement.
- Worked with engineers and stakeholders to define UI/UX requirements and implement key features.

PROJECTS

Perfect Resumes

Aug. 2024 – Sep. 2024 📅

- Led a team of 3 developers to build an AI-powered web application for generating dynamic, job-specific resumes and cover letters.
- Integrated the **Meta LLaMA 3 AI API** (via **Hugging Face**) to generate tailored content, improving application quality and alignment with job descriptions, which enhanced user success rates.
- Developed the full-stack solution, utilizing **ReactJS** and **HTML/CSS** for the responsive front-end, **Python** for the back-end logic, and **SQLite** for efficient data storage.

Fake News Classifier

Jan. 2024 – Jun. 2024 📅

- Led a team of 3 developers to design and deploy a Fake News Classifier using **Python** and **ReactJS**, achieving 90% accuracy in real-time fake news detection from millions of articles.
- Utilized **Apache Spark** and **Hadoop** for distributed data processing and **Cassandra** for scalable data storage, reducing processing time by 40% and ensuring future scalability.
- Developed a dynamic website with **HTML/CSS** for data visualization and search features, deploying the application on **AWS Cloud** for reliability, scalability, and resource management.

SKILLS

- **Software:** Java, C/C++ , C, Python, ROS, LaTeX, MATLAB, SQL, React, Spark, Hadoop, Scikit-learn, OpenCV, Pandas, NumPy, TensorFlow, SQLite, AI APIs
